

REGIS Operational Webinar (28 May 2019)

Document Sharing

Document sharing across LHD's should now be working.

Homepage Tiles Crashing

Homepage tiles were taking extended time to load and causing the system to crash. Hotfix went in that caused the tile to crash (and show a refresh button) but stopped the user being kicked out.

There has since been further investigations and optimization so homepage tiles should not be crashing. Please report if/when specific homepage tiles are crashing.

Multiple Classifications

A bug was identified that caused application to have 2 risk pathway classifications e.g. More than low risk and Low risk. A script was run this morning. If you identify multiple classification please log with helpdesk.

Slow Systems

F1 have acknowledged that the system can be slow in specific areas. Please report "system slowness" via email and let them know specifically where the system slowness is occurring. E.g. clicking on the related documents menu option or opening a meeting.

Specifics will help the vendor identify where further optimization needs to occur.

REGIS Working Groups

Will begin Monday 24th July and finish Wednesday 14th Aug

- Email templates (system generated and editable)
- Agenda and minutes templates
- State wide forms (local amendments, safety forms)
- Reviews

Does your office have templates they can provide for the working groups to consider? Please email them to me ASAP.
