

Creating and Managing Reviews

QUICK REFERENCE GUIDE

FOR RESEARCH OFFICES

Creating and managing lead, scientific or expert reviews

Depending on the processes of the individual Research Office (RO) and the Human Research Ethics Committee (HREC), a committee member who has been allocated as a Lead Reviewer against a new application may be required to submit a review of the application prior to the HREC meeting.

There may also be instances where a RO requests an external expert provide a review or another type of review. The same process to access the application and provide the review should be followed.

The review process is managed through REGIS from the Reviewers receiving an initial email alert to accessing the applications and supporting documents and finally to the reviewer submitting their review through REGIS to the RO.

Note: *The review functionality is a separate process to accessing the general meeting papers. If you are wanting to add an application to a meeting you should access:*

Adding a completed Review to a Meeting.

There are two ways to allow comments from a review to be available to meeting attendees with the meeting papers. Both are accessed through the 'Meeting Documents & Other Business' heading.

1. Copy and paste review details into agenda

Copy and Paste the details from the review into the agenda or a separate document. This may be useful if you want to rephrase comments before they are distributed.

2. Include PDF in meeting papers

The review report can be included in the meeting papers when managing the meeting documents. See QRG *Creating and Preparing HREC Meetings*.
